

As a US citizen I am very concerned about the upcoming June vote on more FCC consolidation and relaxation of restrictions. More public hearings are needed on this VERY important issue. Americans are already being deprived of varied points of view in broadcasting. I am starting to feel that the only way I can hear independent unbiased views not coming from big business is to tune into Public Broadcasting tv and radio stations. Deregulation and relaxing rules is a danger to our society. Much consideration should go into this issue with public hearings. Cynthia Gottry
